

CEU COURSE
**FACADE ACCESS SYSTEMS FOR INTERIOR & EXTERIOR FACADES
MAINTENANCE & WINDOW CLEANING**

CONTINUING EDUCATION PROGRAM

1 HOUR CE CREDIT – AIA/HSW

DESCRIPTION

Understand why a building requires permanent engineered maintenance equipment. Develop an appreciation of the safety requirements for these systems. Learn what major factors should be considered when incorporating maintenance equipment into the building design. Learn how to choose the best system for a particular application.

LEARNING OBJECTIVES

1. Understand why a building requires permanent engineered maintenance equipment.
2. Review the regulations and standards that govern the façade access industry.
3. Learn what major factors to consider when incorporating facade access equipment into building design.
4. Discuss the important building and design factors that will impact system specification for different applications.
